CHROMOSOME ANALYSIS FROM LYMPHOCYTE CULTURE IN SEXUAL AMBIGUITY PATIENT
(Ni Wajen Tirthaningsih, Susy Kristiani)

PATTERN OF TRANSFORMING GROWTH FACTOR-B1 (TGF-B1) LEVEL IN BPH AND NON-BPH PATIENTS
(Endang Retnowati, Siananto Darmadi, Soetjo, Magdalena Tobing)

CHANGES IN THE LEVEL OF ACTH, CORTISOL AND LYMPHOCYTE T COUNT AFTER ESTABLISHING
DIAGNOSIS OF HIV AND AIDS
(Nasrunudin, Soetarto Taat Putra)

THE EFFECT OF AEROBIC EXERCISE ON THE ERYTHROCYTE OSMOTIC FRAGILITY OF THE WISTAR
WHITE RATS
(Sugiharto)

THE EQUATION ANALYSIS OF LINEAR PHARMACOKINETICS MODELS BY AKAIKE'S INFORMATION
CRITERION (AIC) OF DIMINAZENE ACETURATE IN BLOOD PLASMA
(Mochamad Lazzardi)

COMPARISON BETWEEN 0.1% DICLOFENAC NATRIUM AND 0.1% DEXAMETHASONE EYEDROPS IN
REDUCING CATARACT POSTOPERATIVE INFLAMMATION
(Moesfstiab)

THE PHARMACOKINETICS OF LAMIVUDINE IN HEALTHY RABBIT TREATED WITH CIMETIDINE
(Anik Setiaya Budianto, Toetik Aryan)

VALIDITY AND RELIABILITY OF RADAR QUESTIONNAIRE FOR PATIENTS WITH RHEUMATOID
ARTHRITIS
(Joewono Soeroso)

HEIGHT MEASUREMENT BASED ON STERNAL BONE LENGTH IN ADULTS
(Aguie Moch. Algaz, Ahmad Yudianto)

ANTIMICROBIAL RESISTANCE AND ANTIBIOTIC USE IN LOW-INCOME AND DEVELOPING COUNTRIES
(Usman Hadi, Ermi P Kolopaking, Widioseno Gadjitto, Inge C Gyssens, Pj van den Broek)

URETHRAL STRicture IN FEMALE
(Soetjo)

Review Article and Clinical Experience:
Selected Clinical Aspects, Clinical Experiences, and Possible Applications
(Askendar Tjokroprawiro)

**Height Measurement Based on Sternal Bone Length in Adults**

Adequate and qualified education in anatomy is needed to identify bones. Body height is one of the general data that determines incomplete body cases. Body height is measured based on related pattern of body height with the component body length. However, the data on related pattern between sternal bones and body height among the Indonesian adults have not been received. In this research, 50 samples were used. SPSS programme showed 11.05: body height average (Y): 161.2520 + 8.28800 (SD), sternal bone length average (X): 16.0620 + 1.48267 (SD), X/Y ratio: 10.19% + 1.01 (SD), SE: 8.04913, a = 0.05, model of the related equivalent between sternal bone length and body length: Y = 136.488 + 1.542.

Correlation value with correlation coefficient Pearson (r): 0.525, with lower correlation interpretation.

Keyword: body, height, sternal, bone, correlation.
