FOLIA MEDICA INDONESIANA

Vol. 44 No. 2 April - June 2008

TGF-1 AS THE TRIGGER OF PULP FIBROBLAST PROLIFERATION
(Sri Kunarti)

DIFFERENCE IN CYCLOOXYGENASE-2 (COX-2) EXPRESSION BETWEEN LOW AND HIGH GRADE PAPILLARY CARCINOMA IN HUMAN BLADDER CANCER
(Yulizar DR, Hartjojwoto S, Djatisoekanto W, Soemarno T)

DETECTION OF CYTOKERATIN 19 MRNA IN BLOOD AS AN EARLY MARKER OF MICROMETASTATIC TUMOR CELLS OF NASOPHARYNGEAL CARCINOMA PATIENTS IN SURABAYA
(Harnanto Notoatmodjo, Widdodo A Kentjono, Retno Handayani, Francisca Notoatmodjo)

PCR TECHNIQUE DETECTION OF CHLAMYDIA TRACHOMATIS DNA BAND USING SILVER NITRATE STAINING
(Rebekah J Setiabudi, Manik Retno W, Nurul Wiyaya)

CHANGE OF CD4 COUNT, HSP70 AND ANTI-HSP70 LEVELS IN HIV PATIENTS
(Nasronudin)

HIV/AIDS PREVALENCE IN SURABAYA, INDONESIA
(Nasronudin, Yuyuk Susilawati, Atika)

TREATMENT RESPONSE AND ACUTE TOXICITY EVALUATION OF 70 GRAY RADIATION IN NASOPHARYNGEAL CARCINOMA PATIENTS IN DR SOETOMO HOSPITAL, SURABAYA
(Nyoman Satya, H. Sugiroto Suiwedidinardjo)

PHARMACODYNAMIC EFFECTS OF LIGUSTROside GLYCOSIDE (A CNS ACTIVE SUBSTANCE) ISOLATED FROM FRAXINUS GRAFFITI Clarke AGAINST CHEMICALLY INDUCED SEIZURES ON MICE
(Achmad Basem)

MANAGEMENT OF ACUTE GLOMERULONEPHRITIS IN A CHILD WITH ISCHEMIC STROKE AND HYPERTENSIVE CRISIS
(Prastiya Indra Guntawa, Nikim Asmaningsih Soemiarso, Muhammad Sjaifullah Noer, Darto Saharsa)

EFFICACY OF ORLISTAT PLUS DIET COMPARED TO DIET ALONE IN REDUCING BODY WEIGHT AND BODY MASS INDEX
(Hadiq Firdausi)

Review Article:
PATHOGENESIS OF REPEATED ABORTION IN POLYCYSTIC OVARIAN SYNDROME (PCOS)
(Ansani Wiyasa IW)

Review Article:
PROTEIN CALORIE MALNUTRITION AND IMMUNE RESPONSE IN CHILDREN

Review Article: Protein Calorie Malnutrition and Immune Response in Children

Abstract

The fundamental relationship between malnutrition and immunity was initially described as a thymolymphatic deficiency caused by protein calorie malnutrition (PCM). The selective sensitivity of the thymus to nutritional injury is specifically important in the formative phases of the fetal and neonatal immune system. Recent studies suggest that prenatal nutrition and growth during the first of life may predict thymic function in adolescence. Related studies have shown that prenatal zinc deficiency is associated with decreased immune function in later life. The prenatal zinc deficiency is generally accepted that age related in immune response appear to be seen from programmed involution of the thymus. Thymic involution and induction of thymulin secretion from human thymic epithelial cells have obtained with zinc treatment, suggesting that specific nutrients may act as regulatory elements by modulating cellular programs. The potential significance of early nutrition for adaptive immune response in general is also indicated by studies of mucosal immune response to antigens, which have shown that experimental priming at birth ensured both a stronger and a more lasting immune response toward potential pathogens. Malnutrition has an adverse impact on immunological functions and can serve to suppress cell-mediated, humoral, and secretory immune competence. Nutritional immunodeficiencies in human beings appear to respond well to dietary therapy. Micronutrients, trace elements, and vitamins have important regulatory effects on adaptive immune cell function.
