Abstract

This study used qualitative descriptive research method. It was aimed to know the social adjustment process among student who had hearing impairment which study in public school. Respondents of the research were three hearing impairment students with three significant others. Significant others were parent, teacher and best friend. Data was collected by interview. Result of the research have shown that all respondents have good social adjustment skill. The first respondent has effective social adjustment, although sometimes he was disturbed by his friend. The second respondent has effective social adjustment, too. She can made social adjustment although sometimes she looks introvert when she was with her friend. The third respondent has enough ability in social adjustment. She can't speak well with her friend, but she always work hard to join with other people in her school.
