## **CRITICAL & MEDICAL SURGICAL NURSING JOURNAL**

- Perbandingan Latihan Napas Buteyko dan *Upper Body Exercise* Terhadap Arus Puncak Ekspirasi pada Pasien dengan Asma Bronkial
- Kebiasaan Makan Sayur Blendrang Berhubungan dengan Tekanan Darah Pasien Hipertensi
- Ventilasi Paru Pasien dengan Penyakit Paru Obstruksi Kronis (PPOK) Paska Penerapan *Pursed Lips Breathing* dengan Pendekatan *Cognitive Behaviour Therapy*
- Tindakan Mobilisasi Pasien Post Operasi Laparatomi Paska Sosialisasi Alarm Ponsel
- Peran Perawat dalam Pencegahan Kekambuhan Asma
- Faktor yang Berhubungan dengan Kejadian Gastritis pada Santriwati Usia 12-15 tahun
- Aroma Kopi Menurunkan Tingkat Kecemasan Pasien dengan Ulkus Diabetikum
- Senam Ergonomik Menurunkan Tekanan Darah Penderita Hipertensi
- Teknik Gerak Ling Tien Kung Menurunkan Kolesterol pada Penderita Hiperkolesterol
- Faktor yang Mempengaruhi ODHA dalam Pelaksanaan Program CST Berdasarkan *Planned Behavior Theory*
- Dukungan Sosial Keluarga pada ODHA di UPIPI RSUD Dr Soetomo Surabaya

## Table of Contents

No.	Title	Page
1	Efektifitas Latihan Napas Buteyko Dibanding Upper Body Exercise terhadap Arus Puncak Ekspirasi pada Pasien dengan Asma Bronkial	91 - 98
2	Kebiasaan Makan Sayur Blendrang berhubungan dengan Tekanan Darah Pasien Hipertensi	99 - 108
3	Ventilasi Paru Pasien dengan Penyakit Paru Obstruksi Kronis (PPOK) paska penerapan Pursed Lips Breathing dengan Pendekatan Cognitive Behaviour Ther	109 - 120
4	Mobilization In Patient With Post Laparotomy Surgery After Being Given Phone Alarm Socialization	121 - 128
5	The Factors Related to Gastritis Incident on Santriwati 12-15 Years Old	137 - 146
6	Ergonomics Gymnastics On Decreasing Of Blood Pressure In Patient With Hypertension	155 - 163
7	Ling Tien Kung Technique Therapy to reduce cholesterol Levels for Hypercholesterolemiaâ€™s Patients	164 - 174
8	<b>Faktor yang mempengaruhi Odha dalam Pelaksanaan Program CST Berdasarkan Planned Behavior Theory</b>	175 - 189
9	Dukungan Sosial Keluarga Pada ODHA DI UPIPI RSUD Dr Soetomo Surabaya	189 - 195

### **Abstract**

HIV-AIDS (*Human Immunodeficiency Virus*) is a virus that attacks the human immune system. HIV-AIDS can be infect anyone regardless of age,gender,race/ethnicity,social status , and occupation including members of the military. CST program (*Care Support and Treatment*) is a program to provide care of PLWHA with support and treatment. Rumkital Dr.Ramelan Surabaya is one of the participating hospitals run CST program for PLWHA patients.

This study was aimed to analyze factors related to behavior of PLWHA with the CST program based on Theory of Planned Behavior at Poly VCT Rumkital Dr. Ramelan in February 2014.

Design used in this study was cross-sectional design. The independent variables are attitude, subjective norm, PBC, and intentions. The dependent variable is a behavior of PLWHA in CST program at Rumkital Dr. Ramelan. Total sample was 26 respondentnts, taken according inclusion criteria by using purposiv sampling techniques. Data were then analyzed using Spearman 's rho statistical test with level of significance of  $\leq 0.01$ .

Results showed that that attitude ( $p=1.00$  ),subjective norms ( $p=0.00$ ),PBC ( $p=0.00$ ), and intention (0.00).

It can be concluded that there is a significant relationship between subjective norm, PBC, and intentions with behavior of PLWHA in CST program at Rumkital Dr. Ramelan in February 2014. And the attitude has corelation with the behavior of PLWHA in CST Program. .

For further research is expected to conduct research on other factors related to the behavior of PLWHA patients in the CST program.

Keyword : ODHA, CST, Program, Behavior, Planned, Behavior, Theory, , Rumkital, Dr., Ramelan,
