Abstract

ABSTRACT

The performance progress in Tambakrejo Public Health Center (PHC) has not achieved the target yet. By developing community empowerment, it supposed to increase the performance of Tuberculosis Disease Control (TDC) program in Tambakrejo PHC. The purpose of this research is arranging recomendation of community empowerment plan of TDC program in Tambakrejo PHC. The result of this research showed that input of this program belong to good category, but the empowerment process has not optimum yet and participants condition have not maximum either. Based on Focus Group Discussion (FGD) and researcher analysis, it is developed a recomendation of Empowering Plan of TDC Program in Tambakrejo PHC. The recomendations including: Developing TB observer, TB Observer training, Performing capability of community leader, developing intersectoral partnership in order to help TB patients, Inviting Social Departement and Education Department to involve in TB Control Program, Developing medication center in the nearest place to patient's neighborhood, keep the patient in privacy room and comfortzone, prevention the contagious disease by using triase in front of PHC. Those recomendation hopefully can be implemented in the PHC works area, in order increasing the performance of TDC Program especially finding the suspect and the increasing Cure Rate.

Keywords: Community empowerment, Performance of Tuberculosis Disease Control program, Community Participation.
