FOLIA MEDICA INDONESIANA
Vol. 50 No. 1 January – March 2014

GENETIC MUTATION PROFILE OF gyrA AND parC GENE IN CIPROFLOXACIN-RESISTANCE Pseudomonas aeruginosa
(Rosita Febrina, Didi Hasmono, Kuntaman)

THE DEPRESSION PROFILE OF PEOPLE LIVING WITH HIV/AIDS (PLWHA) RECEIVING ANTIRETROVIRAL TREATMENT IN DR. SOETOMO HOSPITAL SURABAYA
(Yosua Hendrik Manurung, Marganita Maria Maramis, Erwin Astha Triyono)

AGREEMENT BETWEEN ESTIMATED APOLIPROTEIN B-100 CONCENTRATION AND APOLIPOPROTEIN B-100 CONCENTRATION MEASURED BY IMMUNOTURBIDIMETRIC METHOD
(Hadisusworo P, Soehita S, Aniwati L)

ER, PR, AND HER-2/NEU PROFILE ON YOUNG BREAST CARCINOMA PATIENTS
(Cesaristina Vidyanti, Dvah Fauziah, Desak Gede Agung Suprabawati)

CORRELATION BETWEEN HEART TYPE FATTY ACID BINDING PROTEIN SERUM LEVEL AND SOLUBLE ST2 IN ACUTE CORONARY SYNDROME PATIENTS
(Dhini Tri Wahyu Nugroho, Mohammad Aminuddin, Jusak Nugraha)

CORRELATION BETWEEN N-TERMINAL PRO-BRAIN NATRIURETIC PEPTIDE LEVEL WITH DYSTHOMIC FUNCTION ECHOCARDIOGRAPHY PARAMETER IN ACUTE CORONARY SYNDROME
(Fouzai Aswad, Muhammad Aminuddin, Jusak Nugraha)

CORRELATION BETWEEN E/VP AND E'/V IN LEFT VENTRICULAR FILLING PRESSURE MEASUREMENT AMONG PATIENTS WITH DILATED CARDIOMYOPATHY
(Rosi Amrilla Fagi, Rochmad Romdani)

CHANGES IN PLATELET COUNT, MEAN PLATELET VOLUME, PLATELET DISTRIBUTION WIDTH, AND PLATELET CRIT IN PULMONARY TUBERCULOSIS SEVERITY
(Fatimah S, Suemarsono)

MICROBIAL PATTERN AND ANTIBIOTIC SUSCEPTIBILITY TEST IN SEMEN GRESIK HOSPITAL 2012
(M Abid Fahruddin, Prihatini)

DIAGNOSTIC VALUES OF IMMATURE GRANULOCYTES, EOSINOPENIA AND I/T RATIO IN DETECTION OF EARLY ONSET NEONATAL SEPSIS IN NEONATES WITH BACTERIAL INFECTION RISK
(Eko Bagus, Hartono Karfar, Fupa Wardhani)

EFFECT OF COFFEE DRINKS TO THE REACTION TIME OF 18-22 YEARS OLD MALE UNIVERSITY STUDENTS
(Gigh Aditya Wardana, Irfiansyah Irwadi, Harlina Sootjpto)

INFLUENCE OF WEIGHTLIFTING ON THE EMERGENCE OF PARTIAL AND FULL THICKNESS ROTATOR CUFF TEAR DETECTED BY ULTRASOUND IMAGING
(Rosy Setiawati, Paulus Rahardjo, Bambang Hartono)

MEAN SCORE OF CERVICAL PEDICILE ANGLE TO MIDLINE AND INFERIOR END PLATE IN ADULT USING MULTI SLICED COMPUTED TOMOGRAPHY
(Ardhiane Kasaba, Paulus Rahardjo)

CHANGES IN PLATELET COUNT, MEAN PLATELET VOLUME, PLATELET DISTRIBUTION WIDTH, AND PLATELETCRIT IN PULMONARY TUBERCULOSIS SEVERITY

Abstract

Tuberculosis is a major public health problem in Indonesia. Tuberculosis is a common condition but the literature about the hematological changes associated with tuberculosis is rare. This study aims to provide information about changes in platelet count, mean platelet volume (MPV), platelet distribution width (PDW) and plateletcrit (PCT) for pulmonary tuberculosis disease severity. 60 patients with pulmonary TB diagnosed by positive sputum test and/or chest X Ray. Comprising 15 patients with minimal/mild lesion on chest X Ray (stage 1), 21 patients with moderate advanced chest X Ray (stage 2), 24 patients with far advanced chest X Ray (stage 3) were included in this analytical study. Mean value of platelet count in TB stage 1 were significantly lower than stage 2 and stage 3. Mean value of platelet count and PCT in TB stage 1 were lower than stage 2 but not significantly (p > 0.05). MPV and PDW value in stage 1 were higher than stage 2 and stage 3 but not significantly. Mean value of platelet count and PCT in TB stage 1 were significantly lower than stage 3. Platelet count and PCT value were significantly higher in pulmonary TB patients with a higher severity disease. (FMI 2014;50:34-36)
