Abstract

Poverty is one of the problems in the socio-economic development in the city of Surabaya. Therefore, efforts to eradicate poverty became one of the priorities of economic development. The levels of poverty that causes many of the female population participate in labor market to reduce poverty through work. This paper aims (1) to find out the role of female education on earnings in the family in Surabaya and (2) to identify educational strategies should be developed for women in the economic strengthening of the family. To overcome the problem of poverty, there are several strategies to reduce poverty levels. One strategy to reduce poverty is through education. Education strategy can be through formal and non-formal education. Preschool education and compulsory education is nine years in the majors for women residents who are still of school age. Then for the population of women who have gone too far do not accidentally drop out of school are given informal education strategies with the goal that they have special expertise so that they can have access to the labor market (activity and can increase income in the family) even though they have no formal education.
