Jejaring Untuk Membangun Kolaborasi Sektor Publik

Abstract

Government is required to always adapt it to the environment. The adjustment is an attempt to respond to global developments. The development will involve the internal and external environment. Internal changes include the complexity of the workload of public organizations. External factors requires public organizations to be more flexible in governance. This article is discuss the governance network is a collaboration of the public sector. The approach used in the writing of this article is literature. Reform and revitalization of the roles of public organizations is done internally to improve the professionalism of the organization. Metamorphosis public organizations in responding to internal and external demands was manifested in the form of reform, revitalization and creation of networking administration. Network government is part of a new paradigm of public governance which seeks to optimize the roles of government in the implementation of public policy and public service. The conclusion of this article the collaboration between government, civil society, and the private sector is a step-by-step optimization of the role of government in the implementation of public policy and public service. Collaborative governance system of government is a step in the 21st century. Involvement of all stakeholders among government, civil society, and the private sector within the framework of governance and democracy spawned egalitariansime governance mengedepakan society interests.
