Pengembangan Formulat Tablet Hisap Rimpang Kencur (Kaempferia galanga L.)

Abstrak:

Formulation of Kaempferia galanga L. lozenges have been studied. The lozenges were made by wet granulation method with gelatin and acacia as binding agents with concentration of 0.5%, 1% and 1.5% respectively. The lozenges were pressed on an hydraulic press with a pressure of 2 tons and 13 mm in diameter. The result of the study showed that both binding agents resulted lozenges with good physical properties and gelatin was better than acacia.
