Gambaran Kemiskinan di Provinsi Jawa Timur Tahun 1990 s/d 2006

Abstrak :
Currently poverty constitutes part of the complexity of nation's problem in Indonesia amid the fasttransitional change and the uncertain condition of global economy. As a result, efforts dealing withpoverty needed to be simultaneously supported by the development process of national awareness and self-supporting attitude. To overcome the poverty, critical awareness in monitoring and responding the government programs, which is based on good governance, needs to be developed. Furthermore, synergetic plan and program implementation need to be continuously susta ined which can allow the development program be effectively and efficiently carried out. One of the instruments expected to be able to encourage the implementation of comprehensively regional development plan is the coordinative forum of participative development.
