

## DRUGS STOCKOUT AND STAGNANT DETERMINANTS AND LOSS IN LOGISTIC UNIT OF HAJI GENERAL HOSPITAL SURABAYA

### Abstrak :

*Expenditure to the drug spent almost 40% of the total budget operational hospital. Therefore drug must be managed effectively and efficiently. The objective of this research is to analyze determinant factors of drug stagnant and stockout and formulate recommendation in anticipating the occurrence of drug stagnant and stockout. This was descriptive research using observational method with cross sectional design. Data were collected during April 2012. By those data, loss of that caused by drug stagnant and stockout could be calculated. This research showed that there was 54% drug item that stockout and 39% was stagnant. The stockout in Haji General Hospital were caused by inaccurate planning of floor stock in service unit and lack of human resources. The drug stagnant was happened because there was an excessive requirement planning by user in using medicine. Total loss that caused by stagnant and stockout was about IDR 255.933.139. This research showed that implementation of management system in logistic unit of Pharmacy Installation of Haji General Hospital Surabaya need reparation.*
