Perilaku Penemuan Informasi Mahasiswa FISIP dan Fakultas Farmasi Unair dalam Proses Penulisan Skripsi

Abstrak :

This research aims at seeking more information about the information seeking behavior of the students who are in the process of writing "skripsi". The research compares the information seeking behavior between students of Faculty of Social and Political Sciences and students of the Faculty of Pharmacy of Airlangga University, Surabaya. Using descriptive quantitative research methods with a case study format, the result of this research shows that information seeking behavior of students appears in the context of information need.

Keyword :

Information seeking behavior, , writing
